

ENGLISH

FIT:

- 1) Untwist the lanyard, if needed.
- 2) Dress the rubber loops around the safety glass ear stems, past the first bump.
- 3) Pull the sleeve up to lock the loop on both stems.
- 4) Close the plastic snap. Tug on the snap to ensure the lanyard is secured.

CLEANING AND CARE:

Wipe the lanyard with a damp cloth as needed. Avoid getting the lanyard wet. Do NOT wash using strong detergents, bleach, ammonia, solvents or abrasive cleaners. Inspect the lanyard daily. Replace immediately if signs of fraying, cracking, discoloration, stretching, tearing or other unusual wear are seen. Lanyard should be replaced immediately after experiencing a severe snag, even if no visual signs of damage are noticed.

Store your lanyard and safety glasses in cool locations, away from direct sunlight or extreme heat.

WARNING:

Break-away performance will vary and lanyard will NOT break away under all conditions. End-user should test the break-away feature for suitability for their application. Altering the lanyard may compromise its function permanently, leading to serious personal injury.
