## DESCRIPTION

The Acuvim-L series are multifunction power meters manufactured by Accuenergy. It is the ideal choice for monitoring and controlling of power distribution system. Some of the features and electric power parameters available on the Acuvim-L are:

- True-RMS Measuring Parameter
- 4-quadrant Energy
- Power Quality Analysis
- Over/Under Limit Alarm
- Energy Pulse Output
- TOU, 4 Tariffs, 12 Seasons, 14 Schedules

Acuvim-L may be used as a data gathering device for an intelligent Power Distribution System or a Plant Automation System. All monitoring data is available via digital RS485 communication port running Modbus® Protocol.

The quality of the power system is important with increasing use of electronic loads such as computers, ballasts or variable frequency drives. With the Acuvim-L power analysis option, any phase current or voltage can be displayed and the harmonic content calculated. By knowing the harmonic distribution, action can be taken to prevent overheated transformers, motors, capacitors, neutral wires and nuisance breaker trips. Redistribution of the system loading can also be determined.

### Alarm

Two (2) parameters may be set within a specified time interval. If indicated parameter is over or under its setting limit and persists over the specified time interval, the event will be recorded with time stamps and trigger the alarm DO output. The indicated parameter can be selected from any of the 35 parameters available.

### I/O option module

The Acuvim-DL/EL model can extend the I/O module. Digital input, pulse counter, pulse output and SOE can be provided by extension I/O module.

### Pulse Output option

Two digital outputs can be configured as pulse output for kWh and kvarh. The pulse rate and width can be set.

### Communication

RS485, industry standard Modbus® RTU protocol; Options are the second RS485 module, PROFIBUS-DP/VO module.

### Display

## DIMENSIONS

### Note:

1. The cable length connecting the Remote Display Unit and the DIN Rail Meter is 2 metres (6 feet). Contact your customer service rep if you require a longer cable.
2. The Remote Display Unit and Display Meter have the same cutout.

## IP66/NEMA4X Protection Cover

The **IP66/NEMA4X Protection Cover** is designed for **Acuvim-L**, Acuvim II and all 96mm by 96mm display panel meters; it increases the IP environmental rating of a meter's display to IP66 or NEMA 4X regardless of the original rating of display.

The IP66/NEMA4X Protection Cover prevents damage from dust, water, and other elements when paired with Acuvim II and L series meters they become an effective solution for high protection-required applications, such as outdoor panels.

**Note:** To use the display keys, easily remove the IP66/NEMA4X Protection Cover as the seal is made of durable - tight grip rubber. Simply push back in place when you're done.
